TARGETING LEARNING

Presentation by: Dianne Peck and Julie Peck

The difference between what a child can do without help and what she can do with help is called the 'zone of proximal development'. If effective learning is to occur teachers and students must meet in this zone. In schools this is an ongoing challenge as a teacher interacts with a large number of students who may have different zones! This session will explore a range of strategies that have the potential to support all teachers to more effectively personalise the learning process.

Dianne Peck is currently General Manager, Student Learning within the Victorian Department of Education and Early Childhood Development. After teaching for over 25 years, she moved into the Department where she has played a key role in developing curriculum frameworks which are based on learning continua and recognize the key role of general capabilities such as thinking, teamwork and personal management in addition of disciplinary knowledge and skills. Dianne has a strong interest in learning theory and in understanding how the latest developments in neuroscience can contribute to supporting improved student learning. Most recently she has been involved in the implementation of the Ultronet, a student centered electronic learning environment that supports high quality learning and teaching, connects students, teachers and parents and enables efficient knowledge transfer.

Julie Peck, Australia’s first Feldenkrais Trainer, runs a busy Feldenkrais practice, is currently Educational Director of the Melbourne 4 FPTP & is involved in teaching students and practitioners here in Australia and overseas. She is interested in exploring and understanding more deeply the legacy that Moshe Feldenkrais left us and in continuing to develop and refine this work in her ongoing learning, in her practice and her teaching.

Saturday 27th August, 10:00 – 12noon
The Greek Club, 29 Edmondstone St. South Brisbane

An initiative of the Australasian Feldenkrais Symposium 2011
Diane Peck and Julie Peck are bringing together their work in an innovative presentation at the Australasian Feldenkrais Symposium 2011.
However you do not have to attend the whole Symposium to hear this thought provoking presentation. This session is available to non-delegates as a Single Event Ticket for the special attendance price of $55.

To register for this event please go to www.feldenkraisoz.com/prices.
Or call Lesley on 0414 850 758

Feldenkrais symp'oʊsiəm | un n. (pl. -ai). 1. a movement feast. 2. an event for the seriously curious. 3. a gathering to convert ideas and research into movement to further human dignity. 4. an investigative process using workshops, discussions, debates and expert presentations.
